Raja Ampat – Indonesia

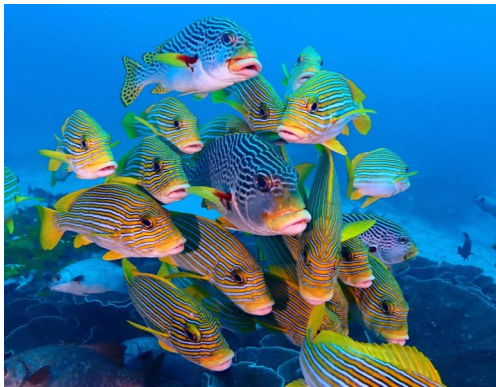

PAPUA EXPLORERS RESORT

Papua Explorers is an all-inclusive dive resort located on the south coast of Gam Island, surrounded by the most iconic dive sites in Northern Raja Ampat.

Only 15 wooden bungalows line up along a massive house reef wall with miles of dense rainforest providing the daily soundtrack, complementing the sound of water lapping underneath every structure. The spacious and airy bungalow interiors lead to spectacular decks, each with sun chairs, hammocks and – most importantly- stairs for direct access to the house reef for swimming and snorkelling.

Raja Ampat is a world renowned diving hotspot. This ecologically diverse paradise is a hub of life. Biodiversity is mirrored on land and sea. Discover islands full of endemic species of flora and fauna, providing a home to rare orchids, birds of paradise and native marsupials such as tree kangaroos and possums. Beneath the surface you will find 75% of the world's species of corals! This supports a huge array of marine creatures, and the area has become famous for it's healthy population of apex predators, such as sharks, whales and dolphins.
